WORK EXPERIENCE

Software Development Engineer at Frontend Hirehunch

11/2023 - 05/2021

Bengaluru

Achievements/Tasks

- Developed and launched "Interviewer Question Library," enabling interviewers to create personalized, non-googleable questions, enhancing the interview process
- created "User and Company Settings" feature, optimizing user experience by providing customizable settings for individuals and companies which reduced the user management process by 60-70%
- developed a sophisticated system wherein companies can seamlessly link pertinent questions to their job postings. This can be achieved by selecting questions from a comprehensive library or by directly adding questions from the library to the job post. This innovative feature facilitates the hiring process, empowering companies to identify and recruit the most suitable candidates efficiently.
- I have engineered a sophisticated system that enables companies to conduct multiple rounds of interviews with individual candidates. This capability allows for a comprehensive assessment of each candidate, facilitating a deeper understanding of their qualifications, skills, and suitability for the role. By offering this functionality, our system empowers companies to make well-informed hiring decisions.

Full stack Developer Trainee Wipro

12/2021 - 06/2022

Hyderabad, Telangana

Achievements/Tasks

- **Contributed to resolving UI inconsistencies affecting users at Wipro as a Full-Stack Developer Trainee.**
